-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/13/2009 has been entered.

Acknowledgement is made to the amendment to claim 16, leaving claims 16-20 open to prosecution. Applicant's amendment and remarks were carefully considered and were found persuasive, however after further search and consideration the following new ground of rejection is provided.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

**Claims 16-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rotman (US 7,324,968) in view of Lettich (US PG PUB 20020049622) and further in view of Woods US PG PUB 20020152174).**

In regards to claims 16-20, Rotman teaches a shipping system that acts as a proxy for the seller and is integrated at a payment processor (Rotman, summary and col 14, lines 49-61), but does not specifically mention interacting with an on-line interface hosted by the shipping vendor. Lettich teaches an integration architecture that permits disparate supply chain members to maintain their individual status on a single hosted site. It would have been obvious to a person having ordinary skill in the art at the time of the invention to include in Rotman the integration architecture of Lettich, because this permits one stop shopping and permit the parties to collaborate without losing their individual identities in the supply chain (Lettich, para 0002).

It is also noted that the combination of Rotman and Lettich does not specifically teach that a shipping label is provided via a web page. Woods teaches generating a label and transmitting it to the entity that is shipping the product (Woods, para 0013). It would have been obvious to a person having ordinary skill in the art at the time of the invention to include in Rotman and Lettich sending a shipping label, because this will assure that information is consistent with the information collected from both the buyer and the sender, thus reducing errors.

### ***Response to Arguments***

Applicant's arguments with respect to claims 16-20 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***
